-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

1. This application is in condition for allowance except for the following formal matters:

Please see following statement.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

2. The drawings are objected to because numeral is not in Fig. 4. There are two numerals 1 instead. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the

Art Unit: 2837

applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. Claims 1 and 2 are objected to because of the following informalities:

1. MK. 2 does not mean anything in a claim's preamble and does not carry any patentable weight.

2. Quotation marks are improper in a claim and should be deleted.

3. Claim 1, line 12, the phrase "may be" is indefinite.

4. Claim 2, line 2, the phrase "as shown in the drawings" is improper in a claim because any claimed subject matter must be recited clearly and precisely to be considered for patentability, not the drawings.

5. "the component" in claim 1, lines 4 and 7 lack antecedent basis and is not defined in the specific embodiment section. It is not clear whether it refers to rigidity layers 3 and 4. The applicant is reminded that claim language must be consistent with the language stated in the specification to avoid confusion.

6. Claim 2, line 12, "approx." is improper and should be spelled out since a period can only be at the end of a claim.

Appropriate correction is required.

4. The claims are allowable over the prior art for at least the reason that the prior art fails to reasonably teach or suggest in claim 1 that two tension fixings, one of which is immediately behind the trailing edge of the upper and lower moment plates which

Art Unit: 2837

passes through both the upper and lower grip layers, and through all other layers and which is adjustable to alter the tension in the upper and lower grip layers to enhance the opening of the upper and lower halves of the plectrum at the blade end as set forth in the claimed combination.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-yung Hsieh whose telephone number is 571-272-2065. The examiner can normally be reached on 7:00-3:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Martin can be reached on 571-272-2107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
